Sign up a friend and you'll get a discount of 80% ! Best regards !

The link to this very file hidden in spam messages using the steganography algorithm of spammic.com.

"In order to transmit information through an open channel without detection by anyone other than the receiver, a covert channel can be used. In information theory, a covert channel is a parasitic communications channel that is hidden within the medium of a legitimate communication channel. For example, steganography is a form of covert channel in which certain properties of the cover medium are manipulated in an unexpected, unconventional, or unforeseen way so that, with steganographic transmission, the encrypted messages can be camouflaged in a seemingly innocent medium and sent to the receiver with less chance of being suspected and attacked. Ideally, because the changes to the medium are so subtle, anyone not specifically looking for a hidden message is unlikely to notice the changes."
